To whom it may concern

Dear Sir or Madam:

Subject: the FAB intelligent controller / PLC

Please find on this CD information about the FAB PLC for your perusal. Our company is intending to bring this product to the NZ Market and is researching the demand

We believe this product is a very cost-effective alternative solution for the automation industry. For the basic unit, 6 point AC inputs plus 4 point relay outputs with LCD and an interface between FAB and PC for programming and monitoring, you will be looking at \$164.95 + GST each, for a minimum quantity of 20 units.

The device comes also in 12 point input and 8 point output. Input can be AC or DC, with or without analog input. Output can be either Relay or transistor

The following interfaces are available

- Voice module: voice alarm, telephone control, dial automation
- Interface between FAB and Modem for remote control for long distance
- Interface between FAB and 485 BUS for networking
- Interface between PC and 485 BUS for networking
- Interface between FAB and PC for programming and monitoring

Please let us know your comments. We're looking forward to hearing from you.

Yours Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Kloeg', with a long horizontal flourish extending to the right.

Jim Kloeg
